

Open Science Publication Award

The goal of the award is to recognize doctoral students who are incorporating Open Science principles and practices into their refereed articles. We aim to provide these senior students with recognition and a small monetary award (\$500). Up to 2 awards are available per cycle. Award winners and honorable mentions will be recognized on our website.

Criteria for eligibility:

- 1) The student must have advanced to candidacy at the time of application
- 2) The article must incorporate Open Science practices that are appropriate for the field. These may include
 - Study pre-registration
 - Open Data
 - Open Code
 - Open Access through the publisher or through the use of a preprint server
- 3) Previous winners are ineligible

Required material to be submitted for consideration:

- 1) The article / supplementary material supporting the criteria
- 2) A cover letter describing how the article incorporates Open Science practices

Upcoming Deadlines (3x / year)

December 2nd, 2022

April 21st, 2023

July 21, 2023

Graduate Coordinators,

I would like to call your attention to two exciting [opportunities](#) being offered by the NSF-funded Innovations in Graduate Education program in Open Science. Please share these opportunities both with your doctoral students and with your faculty and encourage them to apply.

The **Graduate Fellows in Open Science program** is designed to support and recognize students who aim to increase the use of Open Science practices in their research. Fellows will attend open science workshops, mentor peers, and present at an Open Science Symposium in Spring 2023. Fellows will receive a \$2,500 stipend for the 2022-2023 academic year and will be eligible to apply for reimbursement of open access publication fees for reputable academic journals.

The **Faculty Fellows in Open Science** program is designed to encourage faculty members to incorporate training and advocacy for Open Science into their courses. Fellows will be expected to participate in a ½ day workshop on applying Open Science practices in instruction. Following this workshop, fellows will prepare and share a document outlining their proposed changes to their course(s) to be implemented for the Fall 2022 semester. Fellows will receive a spend of \$2,500, which must be spent by December 2022. The spend must be spent on expenses that promote Open Science. This may include summer salary, student workers, materials and supplies, honoraria for guest speakers, and travel to conferences or workshops.

For more information, please see the [Open Science Alliance webpage](#). For full consideration, applications must be submitted by **April 1, 2022**.
