Graduate Fellows in Open Science Program

The *Graduate Fellows in Open Science Program* is designed to support and recognize students who aim to increase the use of Open Science practices in their research. It is funded by an NSF Innovations in Graduate Education award.

Eligibility: Applicants must
- be currently enrolled in a STEM Ph.D. program at the University of Georgia,
- have completed at least one year of study in the Ph.D. program, and
- have established an independent line of research under the supervision of a faculty advisory committee.

Expectations: Selected applicants are expected to become strong advocates for Open Science within their department/college, and are expected to participate as part of a student-faculty network of Open Science fellows.   This entails:
- Practicing Open Science in their own research
- Attending monthly fellows' meetings
- Attending and assisting with Open Science Workshops
- Mentoring peers in Open Science and encouraging increased adoption of Open Science
- Presenting at an Open Science Symposium to be held Spring 2023

Stipend: Fellows will receive a $2,500 stipend for the 2022-2023 academic year, which entails a 1-year commitment as described above. In addition, fellows will be eligible to apply for reimbursement of open access publication fees for reputable academic journals.

Application: Students may apply for the program via the link below. The primary criterion under consideration is the potential for the student to increase their own practice, and the practices of others, of Open Science, including the requisite skills and technologies involved. The program is also aiming to recruit a group with diverse perspectives and backgrounds.

Required Application Materials:
- 1-page statement of how open science is important to your research and your field of study.
- Short CV, including any relevant publications and products that show evidence of open science
- Letter of support from your major professor (which may include other faculty members or staff involved in your open science mentorship)

Full Consideration Deadline: April 1st, 2022
